A decorative horizontal bar at the bottom of the page, composed of two rows of black squares. The top row contains 24 squares, and the bottom row contains 10 squares, creating a stepped effect.

Figure 1. A schematic diagram of the experimental setup for the measurement of the absorption coefficient.

A horizontal row of 15 solid black squares arranged in a single line.

██████████ ██████████ ██████████ ██████████ ██████████ ██████████ ██████████ ██████████ ██████████

A horizontal color bar consisting of a series of colored squares arranged side-by-side. The colors transition from dark blue on the left to white on the right, with intermediate colors including purple, red, orange, yellow, and green.

A horizontal row of 20 black squares, each representing a bit in a binary sequence. The sequence starts with 10 white squares followed by 10 black squares.

A horizontal row of 24 black squares. The 13th square from the left is white, while all other squares are black.

A horizontal sequence of black squares of varying widths, representing a digital signal or binary data. The sequence consists of two main groups: a long row of approximately 30 squares followed by a shorter row of about 10 squares. The last square in the second group is partially cut off on the right side.
